

DAY - ①

*TASK - ①

1. what is CSS:

CSS stands for cascading style sheets. It is a style sheet language used to control the presentation appearance of HTML elements.

2. why do we use CSS:

CSS is used to style and design web page. It controls colors, fonts, spacing, layout, positioning, responsive design and other aspects.

3. what are three types of CSS

*Inline CSS

*Internal CSS

*External CSS

4. CSS type is preferred for large project. External CSS is generally preferred because it is reusable, maintainable and keeps styling separate from HTML elements.

5. cascading means

cascading refers to the process CSS uses to resolve conflicts when multiple rules apply to the same element, considering factors such as importance, source order.
